

# Mikael BUCH

## Interactive & Graphic Designer

First of all being an interactive and graphic designer, it is in that field that I evolve most of the time. Going from Webdesign & Branding to innovative apps, with rich User Experience and Ui. But my curiosity has also drawn me closer to motion design and 3D as well as generative design.

I'm always striving to find the latest innovation, should it be on a technical perspective or a creative one. My whole education, nourished by my experience in France and abroad has forged me as a multidisciplinary designer, embracing every project from its very early concepts to its final accomplishment.
